IMPORTANT CLINICAL LABORATORY MEMORANDUM

Date: June 29, 2022

To: CAMC Providers
CAMC Staff
CAMC LabWorks Clients

From: Milton Plata, M.D.

Department of Pathology

TOPIC: Discontinuation of Fibrin Split Product Testing

EFFECTIVE: June 29, 2022

As of June 29, 2022, CAMC will no longer be offering Fibrin Split Product (FSP) testing. There was a recent issue with obtaining test kits from the vendor, so on April 1, 2022, we had to temporarily discontinue FSP testing due to lack of kits and supplies. Due to the previous low volume of FSP orders and the recommendation to monitor patients with the D-Dimer assay, it has been decided to permanently discontinue the FSP assay.

It is recommended to monitor patients with the D-Dimer assay

For any further questions, you may reach the Automated Procedures Laboratory Manager, Della Haynes, at 304-388-4184.
