

IMPORTANT CLINICAL LABORATORY MEMORANDUM

Date: January 21, 2026

To: CAMC Providers
CAMC Staff
CAMC LabWorks Clients

From: Vandalia Health South Region Laboratories

Topic: Potential Weather Impact on Reference Laboratory Specimens

Effective: January 23, 2026

With the potential of impactful weather arriving this weekend, the Specimen Referral laboratory is closely monitoring the situation to determine if changes to the shipping schedules will be necessary. In the event of severe weather, FedEx may experience delays causing specimens to not arrive at their destination in a timely manner. If necessary, the Specimen Referral laboratory will hold samples at our facility from Friday, January 23, 2026, until normal transportation schedules resume. We will stabilize specimens as much as possible, but some referred tests (such as bone marrows or genetic testing) must arrive in less than 48 hours. These specimens may require recollection.

Contact the Specimen Referral Department at (304) 388-5954 or Heather Clark (304) 388-4526 with any questions.
